

# GLS - FrtRules for ShipSuite

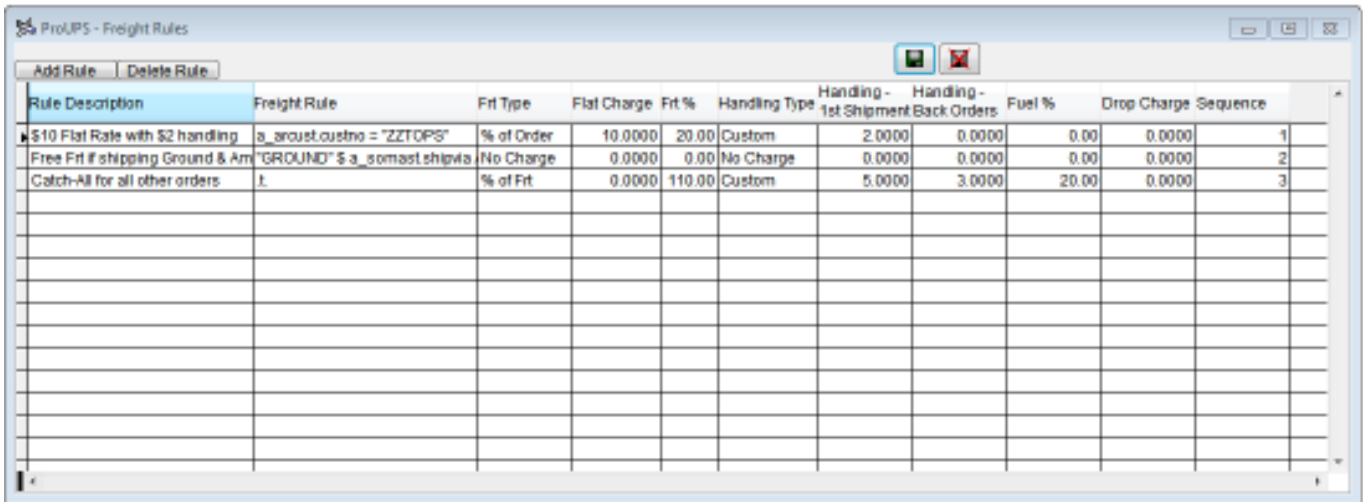

(Pro 6.0 – 7.x SQL & VFP (SBE & EE))

FrtRules allows you to define your shipping business rules. FRTRules is the master control center for defining what freight charges will be charged to your customers and when. In FRTRules, you define your freight rules. These freight rules are written using the syntax of Microsoft Visual FoxPro language. This document provides the technical information that you will need to maintain your freight rules.

FrtRules is found under the custom menu and can be run under the Order Entry or Account Receivable modules.

The following print screen shows 3 freight rule examples. A detailed explanation of each can be found below.

Rule Description	Freight Rule	Frt Type	Flat Charge	Frt %	Handling Type	Handling - 1st Shipment	Handling - Back Orders	Fuel %	Drop Charge	Sequence
\$10 Flat Rate with \$2 handling	a_arcust.custno = "ZZTOPS"	% of Order	10.0000	20.00	Custom	2.0000	0.0000	0.00	0.0000	1
Free Frt if shipping Ground & Am	"GROUND" \$a_somast.shipvts	No Charge	0.0000	0.00	No Charge	0.0000	0.0000	0.00	0.0000	2
Catch-All for all other orders	.t.	% of Frt	0.0000	110.00	Custom	5.0000	3.0000	20.00	0.0000	3
