

GLS - ShipSuite - ProBOL

(Pro 6.5 – 7.x SQL & VFP (SBE & EE))

ShipSuite is a suite of software to manage and integrate shipping operations into the Sage Pro ERP software. This document describes the ProBOL module. Other modules of the ShipSuite are ProUPS, Freight Rules, RateShopper, and AutoBill.

Overview

ProBOL is stand-alone application that integrates with Sage Pro ERP. With ProBOL, a user can create and print Bill of Ladings, Pallet Labels and Packing Slips. Additional shipping documents can be supported as well.

ProBOL is designed to work with a barcode scanner in order to allow quick and accurate data entry. In addition, for customers using the Sage WMS application, ProBOL can restrict the BOL to only approved shipments.

Features

The following is a partial list of the most popular ProBOL features:

- Customizable Shipment Documents
- Integration with Sage Pro ERP to retrieve addresses, weights, and order details.
- Optional integration with the ProUPS module in order to pass the Pro# and weights to the invoice in Pro ERP.
- BOL's are stored and can be retrieved.
- Barcode Scanner support
- Source Code Available

Carrier-specific BOL versions are supported. The following is an example of the Southeaster Freight Line BOL printed from the ProBOL software.

SHIPPER: • FOR MORE ACCURATE RATING PROVIDE ZIP CODES • MARK HIM COLUMN FOR HAZARDOUS MATERIALS
 • FREIGHT CHARGES ARE TO BE PREPAID EXCEPT WHEN COLLECT BOX BELOW IS CHECKED
 ORIGINAL SHORT FORM • NOT NEGOTIABLE • STRAIGHT BILL OF LADING
