

GLS - ProBOL - 3rd Party Shipment Tracking

(Pro 6.5 – 7.x SQL & VFP (SBE & EE))

08/2004

ProBOL is stand-alone software that integrates with Accpac. Using this software, a shipping clerk can quickly create and print the Bill of Lading and Packing Slip to give to drivers as they arrive or as shipments are organized on the loading dock.

ProBOL is designed to work with a barcode scanner in order to allow quick and accurate data entry. All non-numeric fields can be entered by scanning, including the Pro#, BOL#, and Class code. ProBOL automatically recognizes the type of value that is scanned and will enter the data in the appropriate field.

To create a BOL, the clerk will begin scanning (or manually entering) the sales order(s) that will ship on this truck. If you are using the Accpac Warehouse Management System (WMS), only the line items and amounts that have been tagged for shipment will be added to the BOL. If you are not using WMS, the clerk can manually manipulate the lines from the order to reflect the actual shipment.

After the details of the shipment are created, the clerk has the option of printing the BOL and/or the Packing Slip from the BOL tab. They can do this by pressing the Print or Preview buttons.

The screenshot shows the 'Ship Documents' application window. The 'BOL & PackSlip' dropdown menu is active, with 'BOL' and 'Packing Slip' tabs visible. A red banner indicates 'Scan Function is off'. The interface includes several input fields: BOL# (3000), PRO # (73333696-5), Carrier (SOUTHEASTER), Bill Method (PREPAY), Class Code (77.5), Pallet Wght (40.00), # of Cartons (19), Order Wght (675.73), Ship Date (07/06/2004), # of Pallets (2), and # of Items (35). A 'Consignee (To)' section contains text boxes for 'DEALERS ELECTRICAL SUPPLY', 'S. COLLEGE & KOENIG', and 'BRYAN, TX 77801', along with a phone number (254/756-4441) and a 'Manually Add SO#' section with an 'ADD>>' button. A table at the bottom right lists shipment items with columns for Ship#, Item, Qty, and Pilt#.

Ship#	Item	Qty	Pilt#
51161	3706TS-412	2.00	100016588
51161	3230BS-401	1.00	100016588
51161	3402BL	1.00	100016588
51161	3255MN-118	1.00	100016588
51161	3220MN	2.00	100016588
53836	9782BK	4.00	100019986
53836	9782TS	4.00	100019986
53836	3469TU-418	1.00	100019986

If ProUPS is also installed, this Pro# will pull into the invoice as a Tracking Number. The date shipped will also be pulled in from the BOL.
